

PUSH-THROUGH DSAEK TISSUE INSERTER

WEISS GLASS CANULA - BESSON

The Besson Cannula represents a significant advancement in DSAEK procedures.

This cannula is an innovative design for no-touch graft delivery. The prepared tissue is pre-loaded into the cannula, allowing for gentle and controlled insertion. The 3.5mm outer diameter of the cannula ensures smooth passage through the incision.

The Besson Cannula's advanced design was created to significantly streamline surgical workflow and reduce overall operating room (OR) time.

Physician specifications:

Graft diameter: 7.5 - 8.5mm

Recommended Incision Size: 4.5mm
