

GAIN CONTROL AND MINIMIZE CELL LOSS WITH ENDO-IN PREPARED DMEK TISSUE

TissueGUARD DMEK INJECTOR

The TissueGUARD DMEK Injector is engineered for universal compatibility with both Endo-out (natural) and Endo-in (tri-folded) DMEK techniques. Its innovative design allows surgeons to seamlessly adapt to different surgical preferences and patient needs. The injector is designed for easy handling, providing enhanced control and precision while delivering the DMEK graft.

The TissueGUARD DMEK Injector also offers a uniquely designed polymeric material selection and formulation that includes customized hydrogels tailored to the device and is a universal solution for DMEK surgery.

Physician specifications:

Graft diameter: 7.0 - 8.5mm
2.6mm Incision Size Recommended
